

Ever wondered
how these kind of
incidents could be
prevented?

Smart & timely security alerts
could help in taking
preventive measures to
save precious human lives
and protect valuable assets.

HARNESS THE POWER OF AI

CRIME INCIDENTS

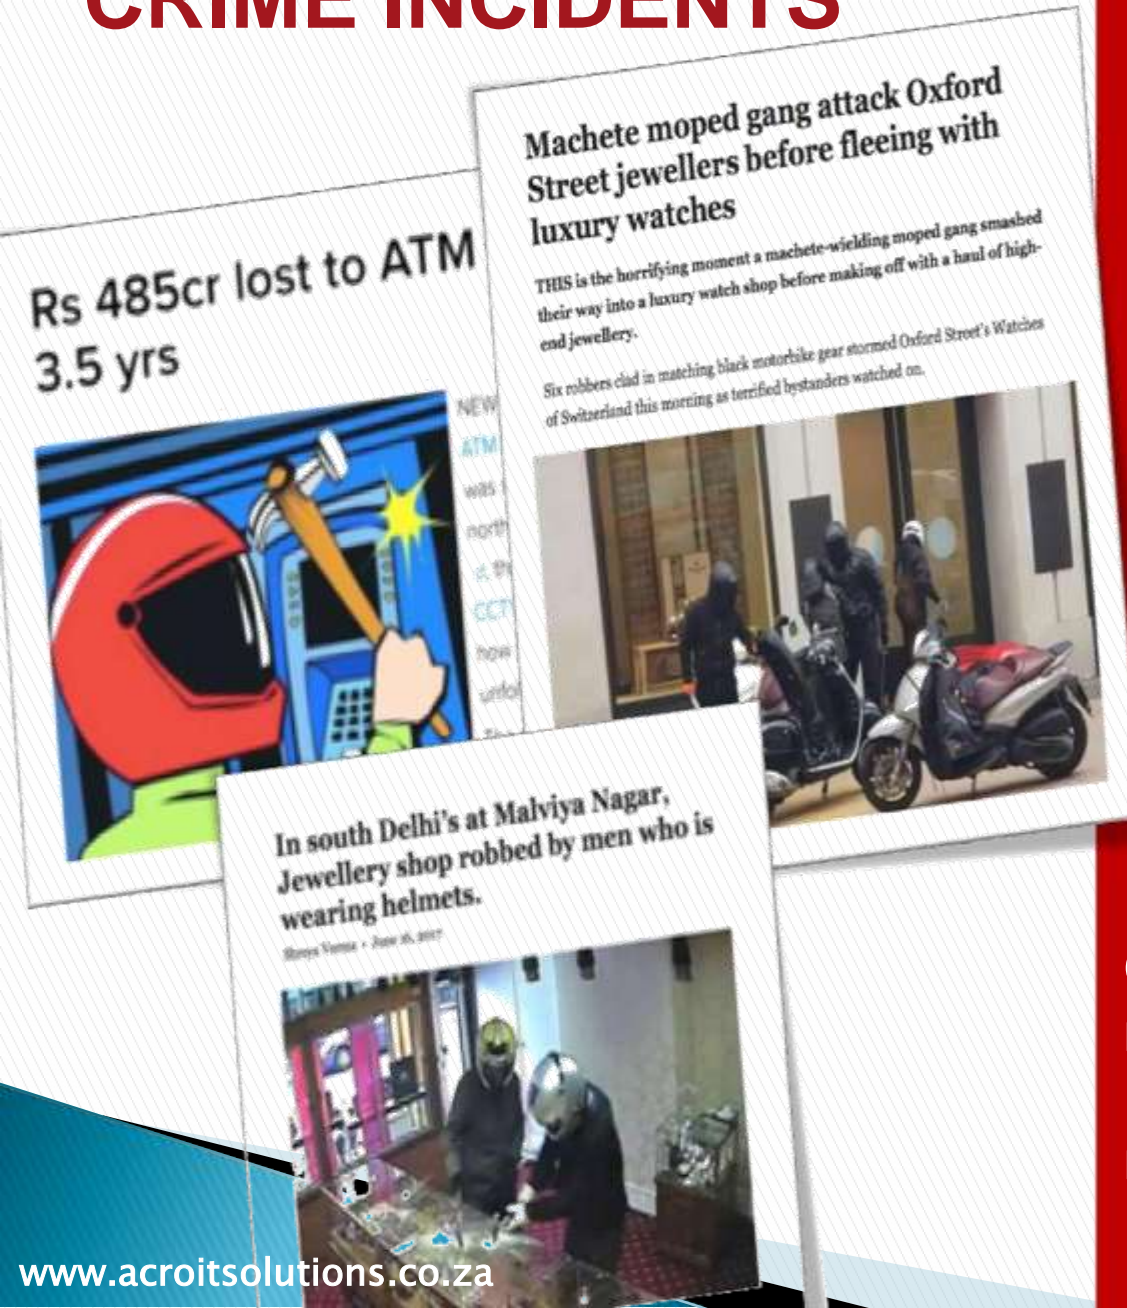

500+ Million CCTV

Cameras are in use world-wide and growing at 14.7% CAGR

**Crime rate
is on the rise
globally!**

**No smart
detection!**

CCTV video recoding is mostly used for post-incident investigation purposes, but not able to prevent!

FIRE ACCIDENTS

With 3,722 Fire Incidents in 2018 in Mumbai, Apathy Claims Lives in Maximum City

The building located opposite to the BMC (Brihanmumbai Municipal Corporation) zonal office in Parel was occupied without an occupancy certificate.

Chaitanya Mangure | CNN-News18 | Updated: December 29, 2018, 8:52 PM IST

In 6 months, Mumbai has seen 12 major fires, 22 deaths

Mumbai has seen a string of fires that have claimed 22 lives and left many injured. The city's cramped planning may be to blame.

India Today Web Desk

The fire in Worli's Beaumonde building is the latest in a series of major fires in Mumbai in the last 6 months. (Photo: Twitter/ANI)

8 Worst Fire Accidents of 2017

According to NCRB 2015, fire accidents kill 48 Indians every day. Fire takes a backseat and we can spot a fire safety violation very easily. Because we have had some of the most tragic fire incidents; we talk about it for a while.

Here are some of the worst fire accidents of 2017. Do we still remember

1. Kamala Mills - Mumbai

This is one of the recent fire tragedies that shook India. Kamala Mills fire accident claimed 14 lives. The cause of the fire is claimed to be from a fire safety violations in these pubs. The pubs did not have fire safety equipment in working condition.

2. Plastic Factory - Ludhiana

A fire broke out at a plastic factory in Ludhiana on 20th November 2017. The fire was caused by a short circuit in the wiring. The fire spread rapidly and caused significant damage to the building and surrounding area.

Smart & timely security alerts could help in taking preventive measures to save precious human lives and protect valuable assets.

OUR SOLUTION – SUPER SECURE

We developed “Super Secure” a computer vision platform using advanced Artificial Intelligence, and Deep Learning technologies to detect specific objects with high accuracy levels.

We add intelligence to CCTV systems to
Analyze. Enhance. Detect. Alert. Prevent

Potential threat detection and instant alerts by our proprietary algorithms

ANALYZE

ENHANCE

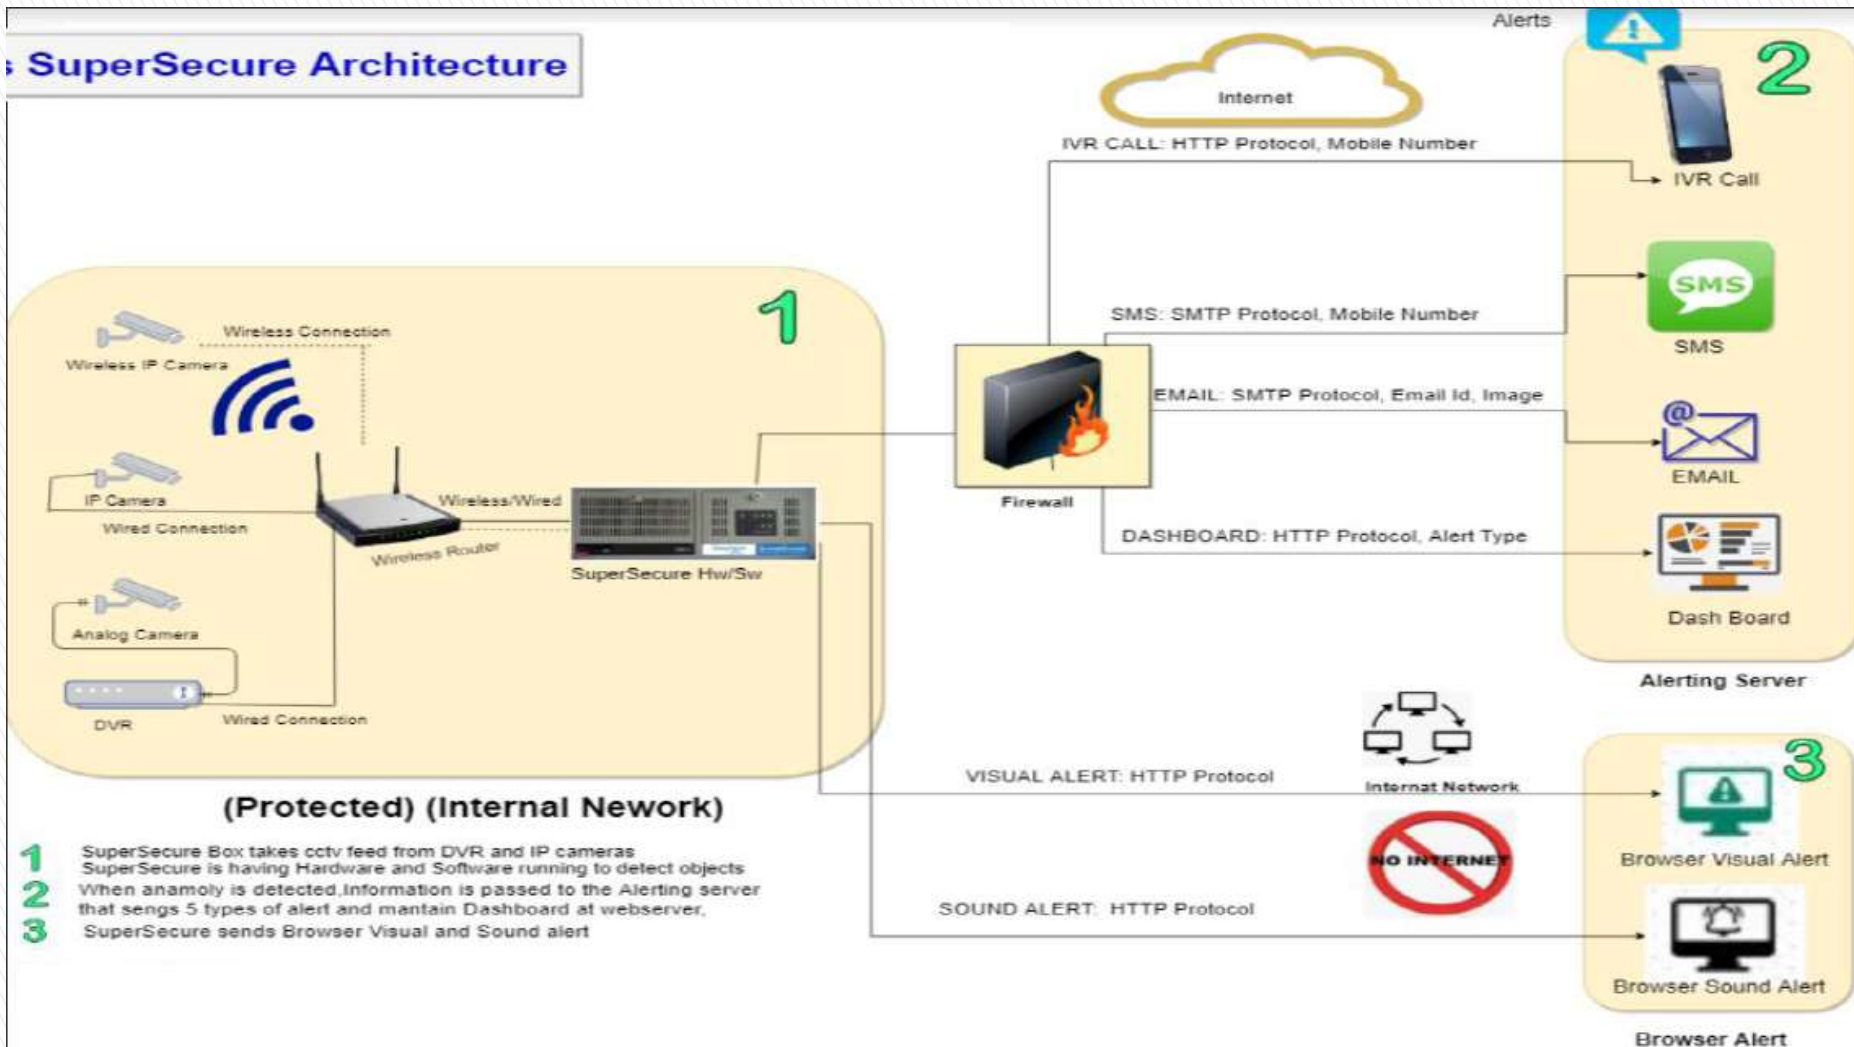

DETECT

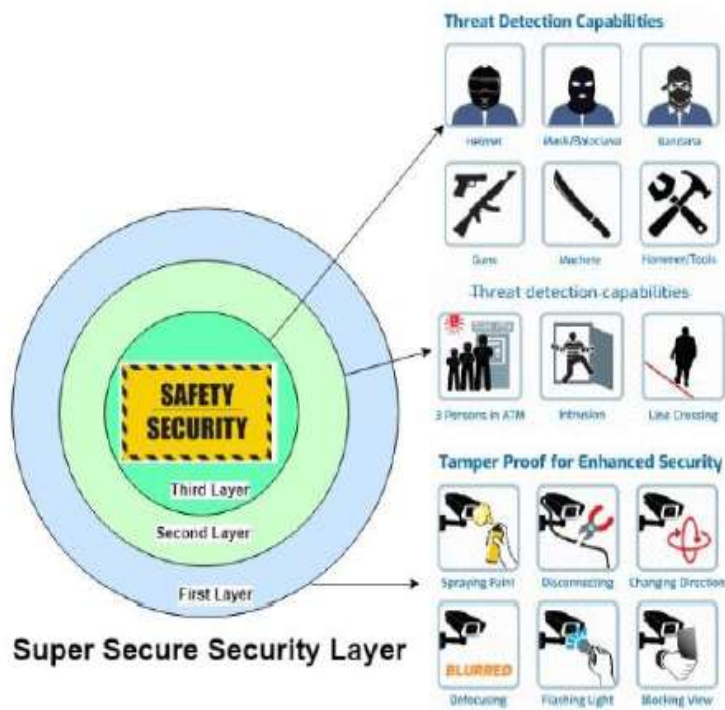

ALERT

To save lives and protect assets

SuperSecure Architecture

Super Secure Use Cases

Super Secure Simulation

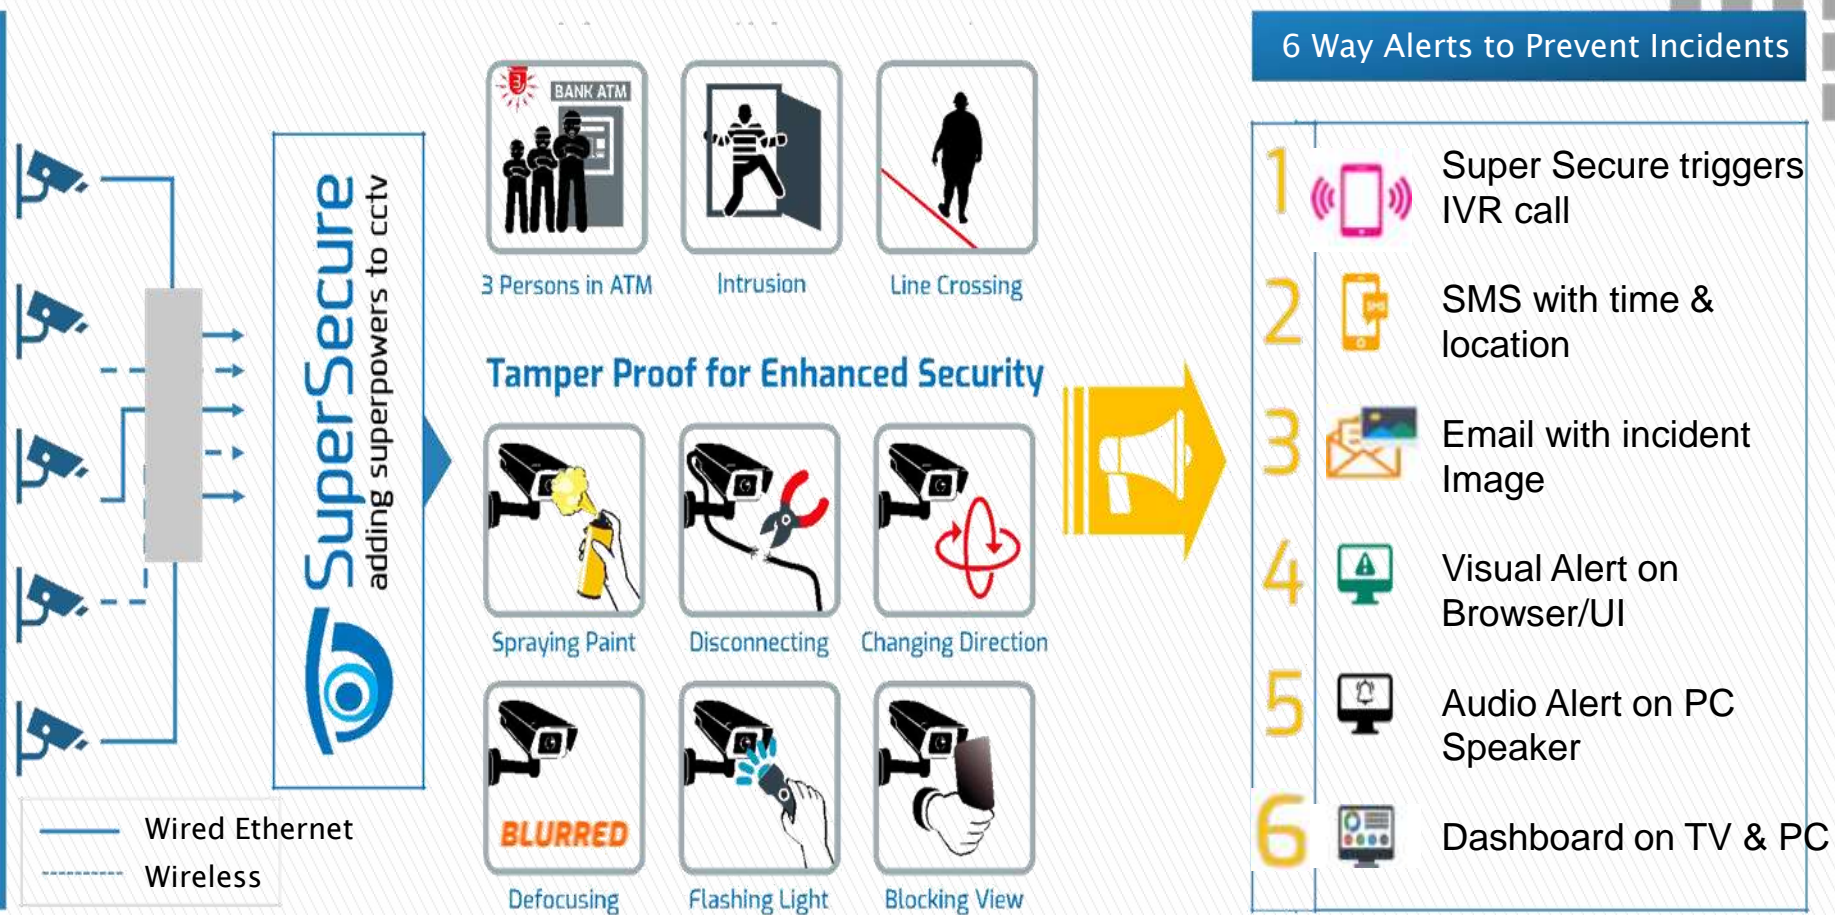

Simulation of Eyes Through CCTV
Camera input to DeepVision Platform

Simulation of Brain to Detect Object Through DeepVision
Inference Platform

Controlling the IOT, HID devices with
Integration of Inference Platform

SUPER SECURE FUNCTIONALITY & CAPABILITY OVERVIEW

SUPER SECURE ADD-ON FEATURES

Threat Detection Capabilities

Helmet

Mask/Balaclava

Bandana

Guns

Machete

Hammer/Tools

Custom Object Detection Possibilities

Crowd Counting

Fighting

Falling

Covering Face

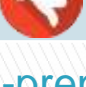

Loitering

Unattended Baggage

Super Secure is an on-premises retrofit solution, works with any CCTV Camera system. Data will be stored on the existing DVR/NVR, **Super Secure** does not store/record data.

REGULAR CCTV SYSTEM Vs SUPER SECURE

Regular CCTV Camera System		Key Features		Super Secure Smart Surveillance Sol.,
Dumb Monitoring & Recording Devices		Smart		Attentive, Responsive and Reactive
Cannot Detect Incidents or Objects		Object Detection		Detect Incidents & Objects in the Real-time
No instant Alerts to Prevent Incidents		Instant Alerts		Instant alerts SMS, IVR Call, Email & Image
Camera Tampering is not foolproof		Tamper Proof		Advanced Camera Tampering Alerts
0% Customization		Customization		100% Customizable to Security needs
Not Available		Business Value		Inventory Mgmt & Crowd Counting etc.,
Cannot Detect Fire		Fire Detection		Detects Fire and Sends instant alerts

Super Secure is an on-premises retrofit solution, works with any CCTV Camera system. Data will be stored on the existing DVR/NVR, **Super Secure** does not store/record data.
